Your Bank or a Scammer?

The Blurred Lines of Phone Trust

Marius Obert
Developer Evangelist @ Twilio

Out-of-Band Verification

Low Friction, High Reach

Designed for the Known Sender

Implicit Trust, Explicit Fraud

The Messaging Trust Gap

Long Codes

For example:
+31 97010251860

Short Codes

For example:
4411

Alphanumeric Sender IDs

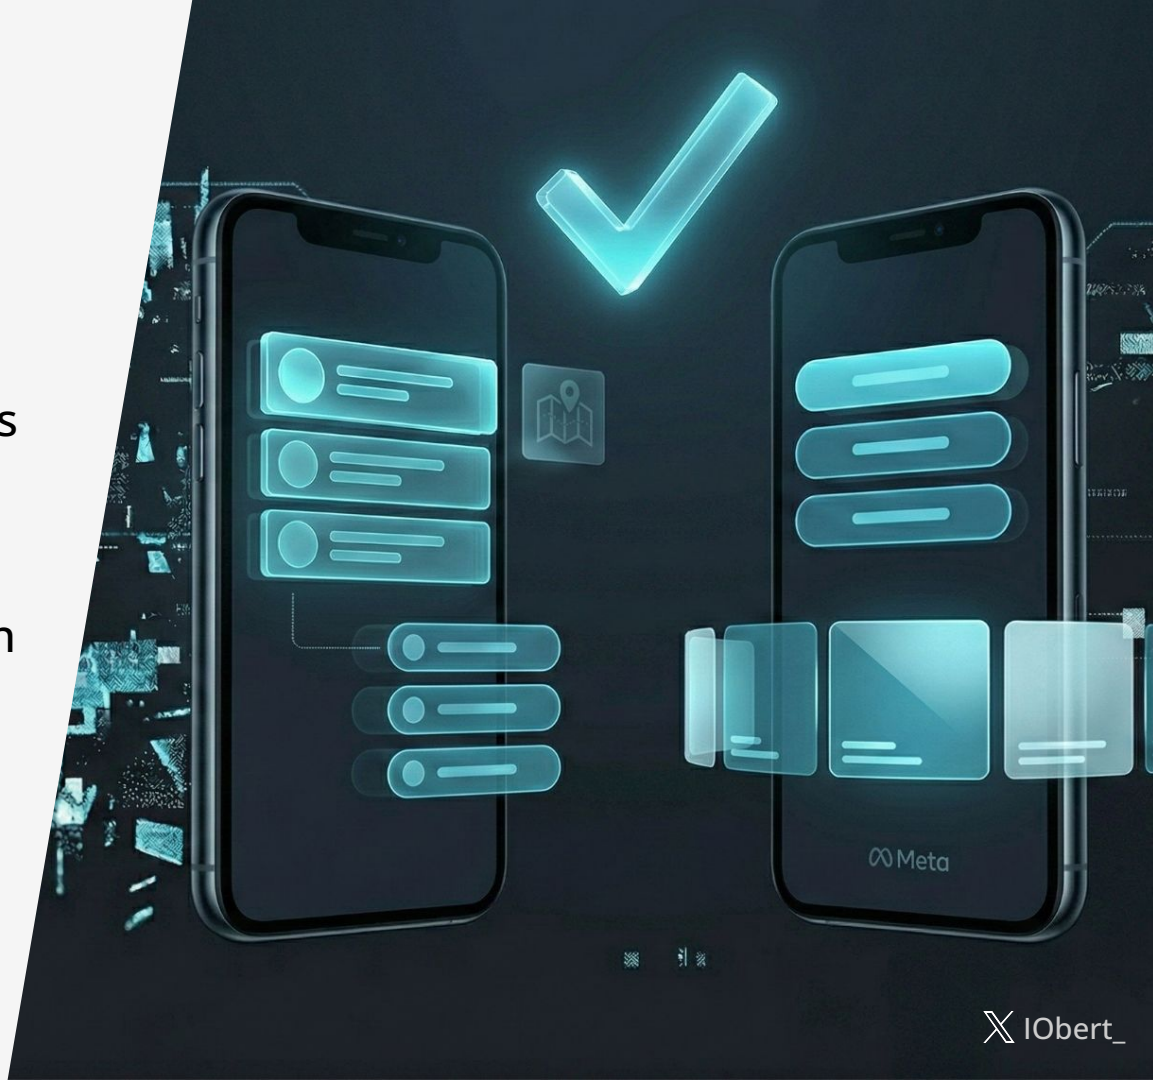
For example:
POSTNL

The "Email Moment"

- Lessons Learned from Email
- Closed-Loop Verification
- Identity (Logo) + Authentication (Checkmark)

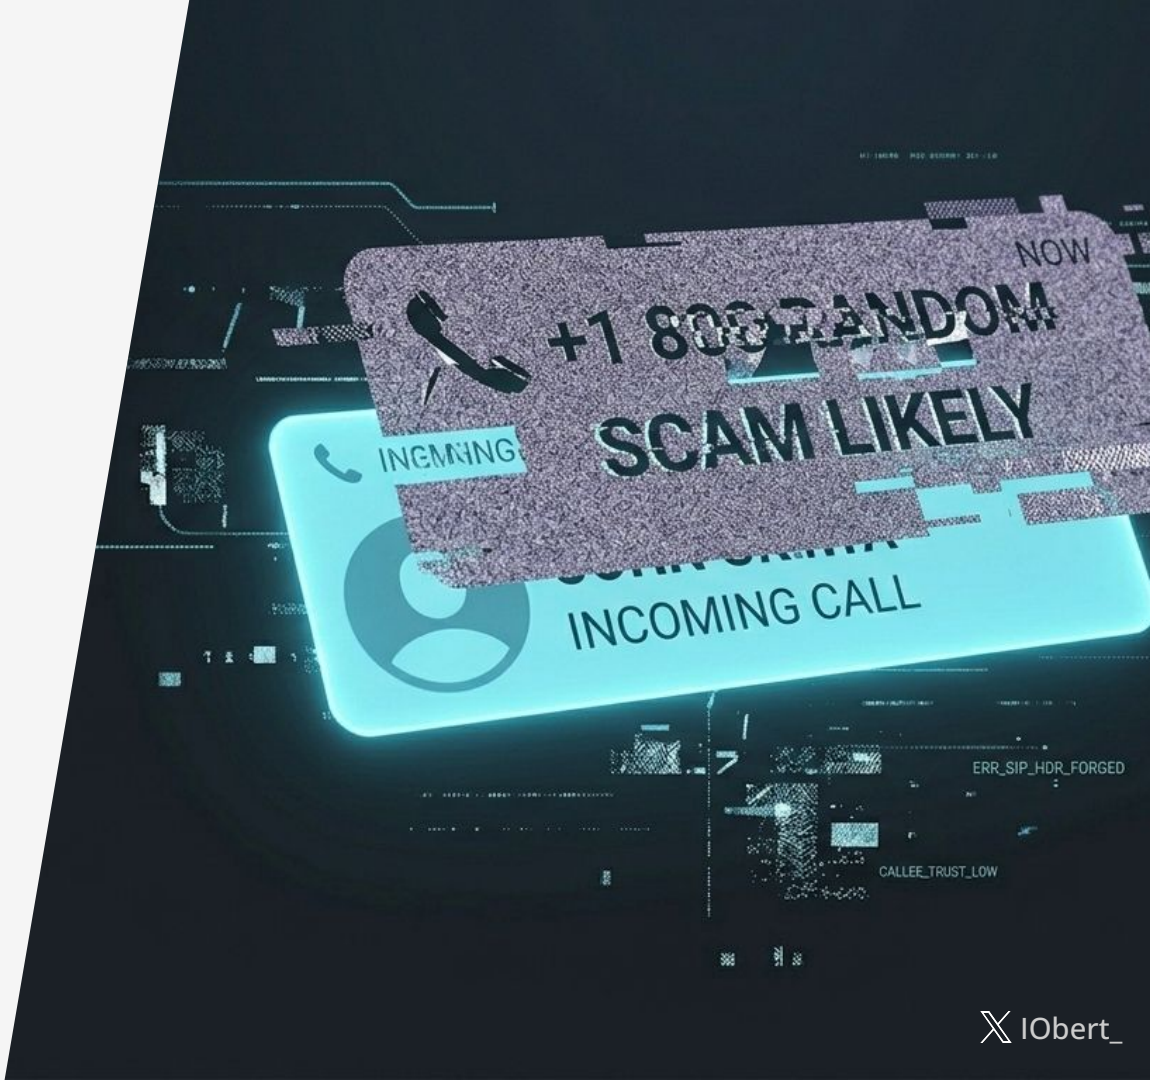
RCS & WhatsApp

- Over-the-top (OTT) channels
- Carrier-Vetted RCS
- WhatsApp/Meta Verification
- Superior UX (Buttons, Lists, Carousels)

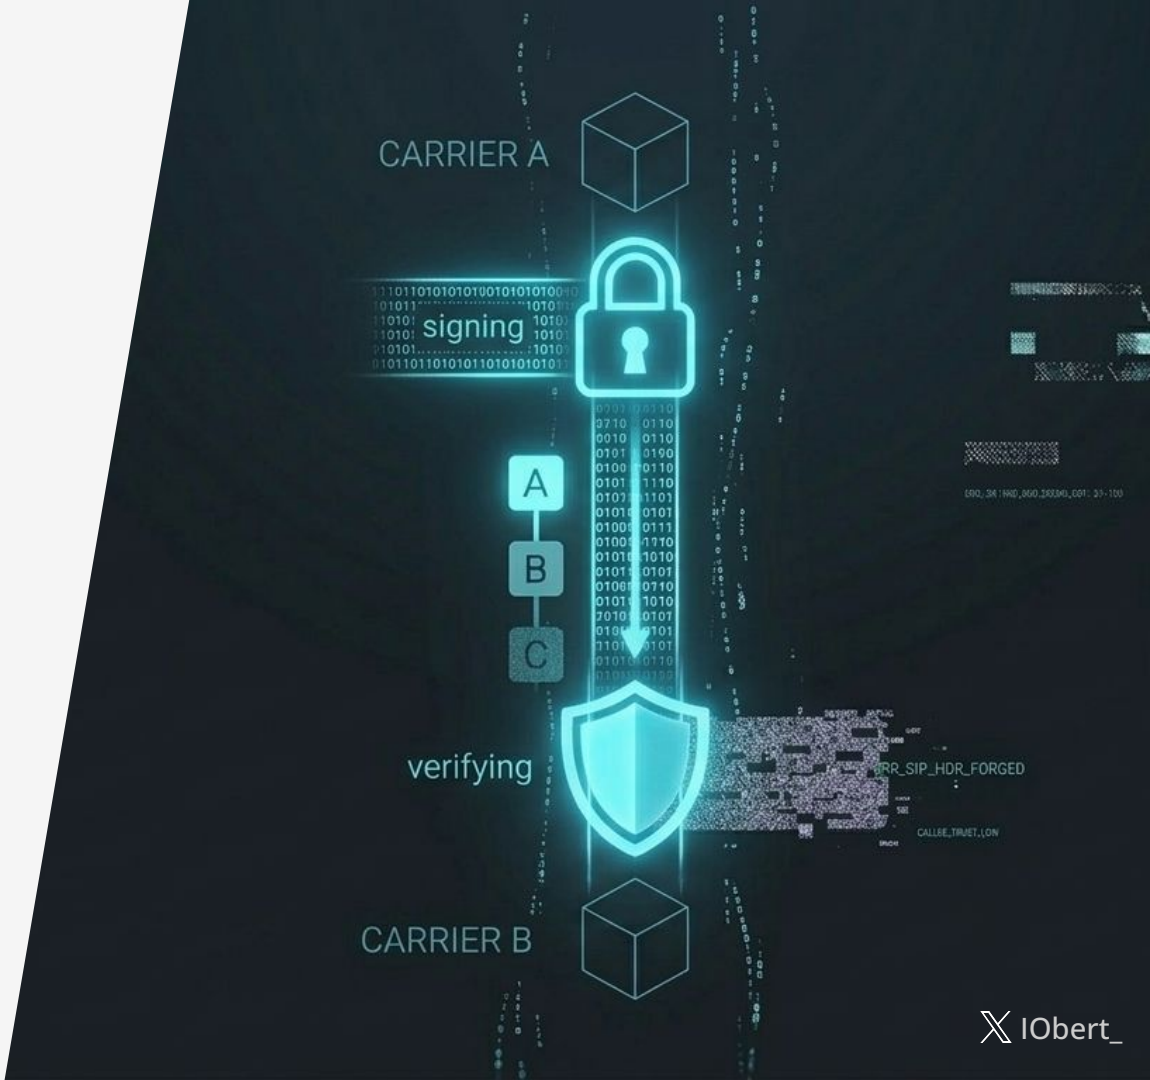


Demo Time

Caller ID != Identity



STIR/SHAKEN



IObert_

The Checkmark for Calls

- **Context Before the Answer** Logo, Name, and 'Reason for Call.'
- **No-Code Edits**
  No API changes required once the profile is vetted.
- **Functional Outcome**
  Higher answer rates reduce operational friction and costs.

IObert_

Demo Time

Als je
niet van
gisteren bent.
If you weren't born yesterday.

From Anonymity to Attestation

Thank you
